

Prepare P750 version 1.0h.

### **New installation**

First time the new P750V1g is running the program will looking for a valid key.

When found you can see the serial number on left top of screen.

The serial number will be stored locally.

On all P750 systems there are a file where calibration values are stored if used. This file name is p6\_XXXX.cfg. The "XXXX" is the last 4 numbers of the serial number. If you use the same key as before you will not get a message that the program not can find this file.

Please copy the old P750\_XXXX.cfg file from you system to the location where the new P750 programs are stored or do following:

Start the P750 program. From start menu do "Ctrl C" to activate the "Hardware Soft Calibration Menu".

Click Ok. This will generate a P750\_XXXX.cfg file with default values for your serial number and key.
